

*Like the multitude of products we manufacture, AZEK Building Products is fueled by forward thinking.*

*With more than 20 years of experience in cellular pvc manufacturing, we make AZEK Trim, the #1 brand of trim; AZEK Moulding; AZEK Deck, the #1 brand of stain resistant decking; AZEK Porch, made with Procell® Technology; and AZEK Rail - featuring the lines of AZEK Trademark, AZEK Premier, and AZEK Reserve railings.*

SIDING ACCESSORIES

## AZEK Trim has the “AZEK Edge”

AZEK Edge, the biggest advancement in cellular pvc trim technology, is available on all AZEK Trim and AZEK Cornerboard products. AZEK Edge, a proprietary advantage, sets a new industry standard as it creates boards that are S4S - or Surfaced 4 Sides. The smooth sealed edges of each board ensure boards will stay cleaner in the dealer yard, on the jobsite, and will be easier to clean if necessary.

The AZEK Edge is produced using strict manufacturing methods that provide precise angle cuts on the edges of each board. This exacting manufacturing process also creates boards with the tightest width tolerances in the pvc trim industry. Together, these distinct attributes make fitting boards side to side and end to end easier with AZEK Edge than any other pvc trim product.

AZEK Trim is the #1 brand of trim and the only brand of trim with a building code report, ESR-1074. AZEK Trim products are available in a variety of sizes.

### UNIFORMITY

- » Solid profile with no voids
- » Consistent thickness
- » Square edges on all four sides
- » Premium lengths
- » Cell structure perfect for milling

### DURABILITY

- » Impervious to insects and moisture
- » Will not rot, cup, split, twist or warp
- » Does not require paint for protection
- » Excellent for ground and masonry contact
- » 25 year warranty

### WORKABILITY

- » Use same tools and fasteners as wood
- » Can be shaped, routed, and mitered
- » Fasten close to the edge without splits
- » Can be milled, moulded, or heat formed for custom millwork applications

### BEAUTY

- » Complements all housing exteriors
- » Natural looking surface provides great looks that last
- » Accepts paints easily for a custom color
- » Looks, sounds and feels like white painted wood trim

## AZEK Moulding

Developed with breakthrough technology, AZEK Moulding has the same look and feel as AZEK Trim. Together, AZEK Trim and AZEK Moulding offer the total low maintenance trim option.

AZEK Mouldings are available in many of the most popular moulding profiles. With the crisp detail of authentic wood mouldings, but with the longevity and durability that AZEK products are known for, AZEK Mouldings will continue to look great year after year.

Impervious to moisture and insects, AZEK Mouldings won't rot, crack, or split. They can be installed using traditional tools and fasteners and, for custom applications, AZEK Moulding products can be laminated and heat formed to create curved moulding details.

### AZEK Trim

- › Features the “AZEK Edge”
- › Perfect for trim, fascia and soffit
- › Works great for window and door surrounds

### AZEK Sheet

- › Perfect for bay windows and raised panels
- › Works well for ceilings and dormers
- › Applications over 16” wide are easy

### AZEK Beadboard

- › Ideal for exterior ceilings and soffits
- › Perfect for wainscoting and hot tub surrounds
- › Reversible edge/center bead and v-groove

### AZEK Cornerboards

- › Features the “AZEK Edge”
- › One-piece, ready to install
- › Seam will not open
- › Complements all housing exteriors

### AZEK Trim Frontier Series

- › Features the “AZEK Edge”
- › Attractive rustic, Frontier texture
- › Reversible surface lies flat either side
- › Same great features of Traditional AZEK Trim

### AZEK Adhesive

- › Water-based, non-toxic, easy cleanup
- › Perfect for AZEK to AZEK adhesion
- › Glued joints will never open

### AZEK AZEK To Mill

- › Full 1 1/4” thick
- › Same high quality and consistent AZEK material
- › Thicker profile makes it easy to fabricate thicker items

### AZEK Mouldings

- › Breakthrough manufacturing technology
- › Same look and feel of AZEK material
- › Available in many of the most popular moulding profiles.
